

## TechLAB Innovation Center Partners with OneStepCloud to accelerate small to mid-size businesses to the Cloud

### FEATURE PARTNER

**Santa Clara, CA - November 21, 2016** - [TechLAB Innovation Center](#), a tech startup hub that provides early to mid-stage technology entrepreneurs with a data-driven platform to help scale up their business operations to the cloud, **today announced its partnership** with [OneStepCloud](#), a leading Infrastructure-as-a-Service provider that prides itself on simplicity allowing small to medium size Business and Enterprises to scale their business operations onto the cloud.

TechLAB Innovation Center foundations is to cultivate technology companies that will power our digital future. TechLAB Innovation Center focuses on the growth and development of technology companies throughout their early years. Our ecosystem affords startups with the ability to come, stay and grow under our guidance while also leveraging our strategic business partners and their expertise. Since January of 2013, 85% of TechLAB companies have become revenue positive.

Leveraging on sophisticated technologies and deep experiences in the IT (software and Hardware), companies working with TechLAB Innovation Center gain access to a network in the world's leading hub for high technology innovation and development center in Silicon Valley. TechLAB Innovation Center strategic location inside a leading carrier-neutral colocation datacenter in Santa Clara, California led by our partner [vXchnge](#) enables new technology companies to gain a quick platform for companies to scale. To further the benefit to our companies TechLAB needed to provide a way to easily and efficiently elevate their businesses needs to the cloud.

With a meticulously crafted ecosystem created with collaboration in mind, collaboration and partnerships among like-minded, high-tech startups occur organically in the TechLAB ecosystem. By partnering with OneStepCloud small and medium-sized businesses can now take advantage of cost savings and easily scale their business operations to the Cloud. With a pay for only the resources used, OneStepCloud offers a wide range of capabilities from the deployment of storage, virtual machines, database, analytics, application, and a customized solutions offering a seamlessly solution in a secure and reliable environment on the vXchnge platform. Companies can deploy their business onto the cloud and benefit from access to all their files and applications anytime and anywhere with an internet access.

“Today’s companies have an irrefutable need to bring their business operations to the Cloud. As such, OneStepCloud needed a dependable and secure infrastructure with robust power capabilities. vXchnge provided all of this, as well as the ability to connect with multiple carrier networks, providing greater redundancy, reach, and revenue points, for our clients,” said Mariusz Proszynski, Chief Executive Officer of OneStepCloud.
